*What are the key risks that are specific to the Issuer?*

**Credit risk**

As part of its trading operations, the Issuer enters into loans, OTC derivatives, securities lending transactions and other financial transactions with a number of counterparties. Credit risk is the risk of loss that the Issuer may incur as a result of borrowers or other counterparties of the Issuer defaulting on their payment obligations in respect of such transactions, including the risks attaching to the Issuer's customers having financial difficulties and risks relating to large exposures, which could impact the Issuer's ability to meet its obligations under the Notes.

**Market risk**

The Issuer faces market risks as an inherent part of its business. The Issuer's market risk relates to the risk of loss that the Issuer may incur because of adverse developments in market values resulting from fluctuations in interest rates, credit spreads, foreign currency exchange rates and equity and commodity prices. The performance of financial markets may cause changes in the value of the Issuer's investment and trading books which may adversely affect the Issuer's financial position, including reducing its revenue which, in turn, could prevent the Issuer from fulfilling its payment obligations under the Notes.

**Liquidity risk**

The Issuer is subject to liquidity risk, being the risk that a lack of funding prevents the Issuer from being able to finance its activities (i.e. to ensure the growth of its assets or perform its obligations as they fall due). The Issuer is subject to the following types of liquidity risk:

- i. physical liquidity risk, being the risk of default by the Issuer on its liabilities to counterparties in any currency because of a shortage of cash or non-cash funds; and
- ii. structural liquidity risk (i.e. concentration risk), being the risk of a significant deterioration of the Issuer's physical or regulatory liquidity due to an imbalance in the Issuer's asset and liability structure, which arises from a mismatch between the maturity of the Issuer's assets and liabilities. Although an unmatched position potentially enhances profitability, it can also increase the risk of losses for the Issuer.

If the Issuer is unable to finance its activities due to a lack of liquidity, this could lead creditors to form a negative view of Issuer's liquidity. This could result in higher borrowing costs and decreased access to various funding sources for the Issuer, which, in turn, could have an adverse effect on the Issuer's business, results of operations, financial position or prospects.

**Insolvency risks under Cypriot law**

The insolvency proceedings to which the Issuer could be subject to in Cyprus are (i) receivership, (ii) administration and (iii) winding up (a) by the court, (b) voluntarily by its shareholders or creditors or (c) subject to the supervision of the court. As the Notes are unsecured obligations, in the event of the insolvency of the Issuer, Noteholders would be unsecured creditors of the Issuer (and each Noteholder would rank *pari passu* with each other) and, depending on the size of the insolvency proceeds recovered following such insolvency, each Noteholder may receive less than it would have expected to receive under the Notes (and this may be less than its initial investment).

**Risk factor relating to the ultimate shareholder of the Issuer**

The ultimate shareholder owning and controlling the Issuer is Oleg Mikhasenko, who is the sole ultimate beneficial owner of the Group. The Issuer does not have any specific measures in place to ensure that this position of control is not abused. If such position of control is abused, this could have a material

adverse effect on the Issuer's financial condition, results of operations and future prospects which may, in turn, result in the Issuer being unable to fulfil its obligation to Noteholders under the Notes.

#### ***Risks factors relating to the Russian Federation***

Economic, political and legal uncertainty in Russia could have a material adverse effect on the Issuer. A significant proportion of the Issuer's revenue is derived from Russian investors and, as such, a large number of the Issuer's counterparties are based in Russia. Instability in Russia (as further described in more detail in the risk factors below) could seriously impact Russian counterparties' ability to invest which could lead to a reduction in the Issuer's revenue. Any such reduction in revenue could potentially affect the Issuer's ability to make payments to Noteholders under the Notes in part or in full.

### **Interest**

In summary, if the Reference Value of the Worst Performing Share (the "**Worst Value**") in respect of an Interest Valuation Date is greater than or equal to at least one of the Snowball Levels, Noteholders will receive an interest payment on the related interest payment date equal to (A) the Specified Denomination multiplied by (B) the Interest Percentage for the highest Snowball Level that is satisfied. Noteholders will also receive on such interest payment date the sum of all unpaid interest amounts in respect of any previous interest payments at such rate. However, if the Reference Value of the Worst Performing Share in respect of such Interest Valuation Date is less than 60%, no interest amount is payable on such interest payment date. In addition, unless the Notes redeem early prior to the Option Interest Payment Date, an additional interest amount may also be payable on the Option Interest Payment Date. In summary, if the official closing price of the ETI on any Wednesday (or the next scheduled trading day for the ETI if such day is not a scheduled trading day) during the Option Observation Period *divided by* the official closing price of such ETI on 2 March 2022, is less than 90%, Noteholders will receive an interest payment on the Option Interest Payment Date equal to (A) the Specified Denomination *multiplied by* (B) 25%.

If the Reference Value in respect of the Worst Performing Share in respect of the last Interest Valuation Date is less than 60% (representing a decline of more than 40% from the Closing Value of such Worst Performing Share as of the Strike Date), Noteholders will receive a final redemption amount in USD equal to (A) the Specified Denomination multiplied by (B) the Reference Value in respect of the Worst Performing Share in respect of the last Interest Valuation Date (which shall be the Knock-in Determination Day and the SPS Redemption Valuation Date), with the result that the nominal amount invested by a Noteholder will be lost at a rate of 1% for every 1% that the Closing Value of such Worst Performing Share in respect of the last Interest Valuation Date is below the Initial Value of such Worst Performing Share.

*What are the key risks that are specific to the Notes?*

In addition to the risks relating to the Issuer (including default risk) that may affect the Issuer's ability to fulfil its obligations under the Notes, there are certain factors which are material for the purposes of assessing the market risks associated with Notes, including that (i) the Notes are unsecured obligations, (ii) the trading market for the Notes may be volatile and may be adversely impacted by many events, (iii) an active secondary market may never be established or may be illiquid and that this may adversely affect the value at which an investor may sell its Notes (investors may suffer a partial or total loss of the amount of their investment), (iv) the trading price of the Notes is affected by a number of factors including, but not limited to, the price of the Shares and ETI Interest and volatility and such factors mean that the trading price of the Notes may be below the Final Redemption Amount, (v) exposure to the Shares and ETI Interest may be achieved by the Issuer entering into hedging arrangements and investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Notes, (vi) the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Notes, or early redemption or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Notes, and (vii) the meetings of Noteholders provisions permit defined majorities to bind all Noteholders. In addition, there are specific risks in relation to Notes which are linked to a basket of Shares and to an ETI Interest and an investment in such Notes will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to share linked or ETI Interest linked Notes include similar market risks to a direct equity or ETI Interest investment, potential adjustment events or extraordinary events affecting the Shares or ETI Interest and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Shares or ETI Interest.
