- have a horizon consistent with the term of this product as determined independently or on the basis of professional advice.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

SUMMARY RISK INDICATOR

The risk indicator assumes you keep the product until 30 November 2021. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because is BCS not able to pay you. We have classified this product as 5 out of 7, which is a medium-high risk class. This classification takes into consideration two elements: 1) the market risk - that rates the potential losses from future performance at a very low level; and 2) the credit risk which estimates that poor market conditions will likely impact to pay you. **Be aware of currency risk. If you will receive payments in a currency other than the official currency of the Member State where the product is marketed, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** A risk that is materially relevant to the product but not included in the summary risk indicator is the risk that in the event the product redeems early due to an autocall, you may be unable to reinvest your money at an attractive rate. You are entitled to receive back at least 100% all of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain. If we are Brokercreditservice Structured Products Plc is not able to pay you what is owed, you could lose your entire investment.

PERFORMANCE SCENARIOS

	AVERAGE RETURN EACH YEAR	4.10%	4.07%	4.37%

This table shows the money you could get back over the next 3 years, under different scenarios, assuming that you invest USD 10,000. The scenarios shown illustrate how your product could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF BCS IS UNABLE TO PAY OUT?

This product is not protected by any investor compensation or guarantee scheme. If Brokercreditservice Structured Products Plc is unable to make a payment and/or is in default, you may lose some or all of your invested amount and any payment may be delayed.

WHAT ARE THE COSTS?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for 3 different holding periods. They include potential early exit penalties. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

COSTS OVER TIME

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.
