Borrowings issued at variable rates expose the Issuer to cash flow interest rate risk. Borrowings issued at fixed rates expose the Issuer to fair value interest rate risk. The Issuer's management monitors the interest rate fluctuations on a continuous basis and acts accordingly.</p> <p><i>Credit risk</i></p> <p>Credit risk arises when a failure by counter parties to discharge their obligations could reduce the amount of future cash inflows from financial assets on hand at the reporting date. The Issuer has no significant concentration of credit risk. The Issuer has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history and monitors on a continuous basis</p>

		<p>the ageing profile of its receivables. Cash balances are held with high credit quality financial institutions and the Issuer has policies to limit the amount of credit exposure to any financial institution.</p> <p><i>Liquidity risk</i></p> <p>Liquidity risk is the risk that arises when the maturity of assets and liabilities does not match. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The Issuer has procedures with the object of minimising such losses such as maintaining sufficient cash and other highly liquid current assets and by having available an adequate amount of committed credit facilities.</p> <p><i>Currency risk</i></p> <p>Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognised assets and liabilities are denominated in a currency that is not the Issuer's measurement currency. The Issuer is exposed to foreign exchange risk arising from various currency exposures primarily with respect to the US Dollar and Russian Roubles. The Issuer's management monitors the exchange rate fluctuations on a continuous basis and acts accordingly.</p> <p><i>Capital risk management</i></p> <p>The Issuer manages its capital to ensure that it will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Issuer's overall strategy remains unchanged from last year.</p>
D.3	Risks Specific to the Notes:	<p>In addition to the risks relating to the Issuer (including the default risk) that may affect the Issuer's ability to fulfil its obligations under the Notes, there are certain factors which are material for the purposes of assessing the market risks associated with Notes issued under the Programme, including that:</p> <ul style="list-style-type: none"> (i) the Notes are unsecured obligations; (ii) the trading market for Notes may be volatile and may be adversely impacted by many events; (iii) an active secondary market may never be established or may be illiquid and that this may adversely affect the value at which an investor may sell its Notes (investors may suffer a partial or total loss of the amount of their investment); (iv) the Notes may be redeemed prior to maturity at the option of the Issuer which may limit their market value; (v) the Notes will be redeemed prior to maturity if certain events occur in respect of any one of the underlying reference entities and the Noteholders may receive less than par (and may lose the entire value of their investment); (vi) the trading price of the Notes is affected by a number of factors including, but not limited to the price of the relevant Underlying Reference(s) and volatility and such factors mean that the trading price of the Notes may be below the Final Redemption Amount or value of the Entitlement; (vii) exposure to the Underlying Reference in many cases will be achieved by the Issuer entering into hedging arrangements and, in respect of Notes linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Notes;

		<p>(viii) the Notes may be redeemed in the case of illegality or impracticability and such cancellation or redemption may result in an investor not realising a return on an investment in the Notes;</p> <p>(ix) the meetings of Noteholders provisions permit defined majorities to bind all Noteholders;</p> <p>(x) any judicial decision or change to an administrative practice or change to English law after the date of this Drawdown Prospectus could materially adversely impact the value of any Notes affected by it.</p> <p>There are specific risks related to the Notes. An investment in the Notes will entail significant risks not associated with an investment in a conventional debt security. The holders of the Notes will be exposed to the credit of the Reference Entities, which exposure shall be all or a part of their investment in such Notes. Upon the occurrence of any of the default events comprising a Credit Event with respect to any Reference Entity, the Noteholders may suffer significant losses at a time when losses may be suffered by a direct investor in obligations of such Reference Entity. However, the holding of a Note is unlikely to lead to outcomes which exactly reflect the impact of investing in an obligation of a Reference Entity, and losses could be considerably greater than would be suffered by a direct investor in the obligations of a Reference Entity and/or could arise for reasons unrelated to such Reference Entity. In certain circumstances Noteholders may lose the entire value of their investment.</p> <p>Actions of the Reference Entities (for example, the repayment or transfer of indebtedness) may adversely affect the value of the Notes.</p> <p>If a Credit Event in respect of one of the Reference Obligations occurs, the Notes will be redeemed early.</p> <p>The Notes do not constitute an acquisition by the holders of the Notes of any interest in any obligation of any Reference Entity, and the Noteholders will not have any voting or other rights in relation to such obligation. The Issuer does not grant any security interest over any such obligation.</p> <p>The Notes are linked to Reference Entities that are subject to sanctions administered, enacted or enforced by the United Kingdom, European Union and/or United States. The sanctions imposed on the Reference Entities may adversely impact the business, financial condition, results of operations and prospects of the Reference Entities. Such adverse impact on the Reference Entities may adversely impact the value of the Notes.</p>
D.6	Risk warning	<p>See Element D.3 above.</p> <p>In the event of the insolvency of an Issuer or if it is otherwise unable or unwilling to repay the Notes when repayment falls due, an investor may lose all or part of his investment in the Notes. In addition, in the case of Notes linked to an Underlying Reference, investors may lose all or part of their investment in the Notes as a result of the terms and conditions of those Notes.</p>
