Section D - Risks

Element	Title	
D.2	Risks Specific to the Issuer:	<p>The Issuer is exposed to market price risk, interest rate risk, credit risk, liquidity risk, currency risk and capital risk management arising from the financial instruments it holds as set out below.</p> <p><i>Market price risk</i></p> <p>Market price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices. The Issuer's available-for-sale financial assets and financial assets at fair value through profit or loss are susceptible to market price risk arising from uncertainties about future prices of the investments. The Issuer's market price risk is managed through diversification of the investment portfolio.</p> <p><i>Interest rate risk</i></p> <p>Interest rate risk is the risk that the value of financial instruments will fluctuate due to changes in market interest rates. Borrowings issued at variable rates expose the Issuer to cash flow interest rate risk. Borrowings issued at fixed rates expose the Issuer to fair value interest rate risk. The Issuer's management monitors the interest rate fluctuations on a continuous basis and acts accordingly.</p> <p><i>Credit risk</i></p> <p>Credit risk arises when a failure by counterparties to discharge their obligations could reduce the amount of future cash inflows from financial assets on hand at the reporting date. The Issuer has no significant concentration of credit risk. The Issuer has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history and monitors on a continuous basis the ageing profile of its receivables. Cash balances are held with high credit quality financial institutions and the Issuer has policies to limit the amount of credit exposure to any financial institution.</p> <p><i>Liquidity risk</i></p>

Element	Title	
		<p>Liquidity risk is the risk that arises when the maturity of assets and liabilities does not match. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The Issuer has procedures with the object of minimising such losses such as maintaining sufficient cash and other highly liquid current assets and by having available an adequate amount of committed credit facilities.</p> <p><i>Currency risk</i></p> <p>Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognised assets and liabilities are denominated in a currency that is not the Issuer's measurement currency. The Issuer is exposed to foreign exchange risk arising from various currency exposures primarily with respect to the US Dollar and Russian Roubles. The Issuer's management monitors the exchange rate fluctuations on a continuous basis and acts accordingly.</p> <p><i>Capital risk management</i></p> <p>The Issuer manages its capital to ensure that it will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Issuer's overall strategy remains unchanged from last year.</p> <p><i>Risks associated with Russian entities</i></p> <p>Some Members of the Group (i.e. BrokerCreditService Ltd and Joint Stock Company "BCS-Investment Bank" are Russian Companies (the "Russian Group Companies") and most of their fixed assets are located in, and a significant portion of the Group's revenues are derived from, Russia.</p> <p>There are certain risks associated with an investment in financial instruments issued by Russian businesses and in the Russian economy generally, which may adversely affect the Group's operations including, without limitation the: (i) political instability in Ukraine and other states and the imposition of various sanctions by the United States, the European Union and other countries on Russian, Ukrainian and other nations' individuals and legal entities; (ii) conflicts between federal and regional authorities and other political factors within Russia; (iii) recent economic instability in Russia; (iv) underdeveloped nature of the Russian banking system which has a limited number of creditworthy banks; (v) risk of the imposition of severe limitations or a prohibition on certain hard currency payments and operations; (vi) underdeveloped nature of the Russian legal system applicable to the market economy; (vii) Governmental authorities in Russia have a high degree of discretion and may at times exercise their discretion arbitrarily, without hearing or prior notice, or in a manner that is influenced by political or commercial considerations; (viii) Russian taxation system is not well developed and is subject to frequent changes; and (ix) interpretation of transfer pricing legislation is uncertain and no court guidance has been provided so the Group may need to make future adjustments.</p>
D.3	Risks Specific to the Notes:	In addition to the risks relating to the Issuer (including the default risk) that may affect the Issuer's ability to fulfil its obligations under the Notes, there are certain factors which are material for the purposes of

Element	Title	
		<p>assessing the market risks associated with Notes issued under the Programme, including that (i) the Notes are unsecured obligations, (ii) the trading market for Notes may be volatile and may be adversely impacted by many events, (iii) an active secondary market may never be established or may be illiquid and that this may adversely affect the value at which an investor may sell its Notes (investors may suffer a partial or total loss of the amount of their investment), (iv) the trading price of the Notes is affected by a number of factors including, but not limited to, (in respect of Notes linked to an Underlying Reference) the price of the relevant Underlying Reference and volatility and such factors mean that the trading price of the Notes may be below the Final Redemption Amount, (v) exposure to the Underlying Reference in many cases will be achieved by the Issuer entering into hedging arrangements and, in respect of Notes linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Notes, (vi) the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Notes, or early redemption or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Notes, (vii) the Notes may be redeemed in the case of illegality or impracticability and such cancellation or redemption may result in an investor not realising a return on an investment in the Notes, (viii) the meetings of Noteholders provisions permit defined majorities to bind all Noteholders, (ix) any judicial decision or change to an administrative practice or change to English law after the date of the Base Prospectus could materially adversely impact the value of any Notes affected by it, and (x) the Discontinuance after the Issue Date of a benchmark used to determine the interest or redemption amount payable on the Notes may adversely impact returns on and the value of the Notes.</p> <p>In addition, there are specific risks in relation to Notes which are linked to an Underlying Reference and an investment in such Notes will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Notes include: (i) in the case of Share Linked Notes, exposure to one or more share, similar market risks to a direct equity investment potential adjustment events or extraordinary events affecting the shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the shares, and (ii) that the Issuer will not provide post-issuance information in relation to the Underlying Reference.</p> <p>Furthermore there are specific risks in relation to Notes linked to an Underlying Reference from an emerging or developing market (including, without limitation, risks associated with political and economic uncertainty, adverse governmental policies, restrictions on foreign investment and currency convertibility, currency exchange rate fluctuations, possible lower levels of disclosure and regulation and uncertainties as to status, interpretation and application of laws, increased custodian costs and administrative difficulties and higher probability of the occurrence of a disruption or adjustment event).</p>

Element	Title	
		Notes traded in emerging or developing countries tend to be less liquid and the prices of such securities more volatile. In certain circumstances Noteholders may lose the entire value of their investment.
D.6	Risk warning:	See Element D.3 above. In the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to repay the Notes when repayment falls due, an investor may lose all or part of his investment in the Notes. In addition, in the case of Notes linked to an Underlying Reference, investors may lose all or part of their investment in the Notes as a result of the terms and conditions of those Notes.
