MANAGEMENT'S REPORT

The Board of Directors of BrokerCreditService Structured Products PLC (the "Company") presents its report together with the audited financial statements of the Company for the year ended 31 December 2024.

Incorporation

The Company BrokerCreditService Structured Products PLC (the "Company") was incorporated in Cyprus on 18 March 2005 as a private limited liability company under the provisions of the Cyprus Companies Law, Cap. 113. In 2015 the Company has been converted into a public limited company. Its registered office is at office is at Agias Fylaxeos 182, Office 203, Kofteros Business Center, 3083 Limassol, Cyprus.

Principal activities and nature of operations of the Company

The Company constitutes an integral part of a wider group of companies (that might be also referred to in public sources as The Ultima World Group or The Ultima World Financial Group or The Ultima World), the top level holding company of the above mentioned being THE ULTIMA WORLD DMCC (till 9 January 2025 FG BCS LTD DMCC, domiciled in United Arab Emirates). The above mentioned The UltimaWorld group has full ownership and exercises control over a number of legal entities including those duly licensed and authorised for financial market services and investment activities, the appropriate licences and authorisations duly issued by EU and third countries regulators and authorities. BrokerCreditService Structured Products Plc acts as an investment and financing company and conducts trading operations in the international securities markets (except for the investment activity that requires authorisation and/or license). This includes entering into transactions with market counterparties and related parties that are members of the The Ultima World Group. These transactions include, but are not limited to, repo transactions, loans and transactions with securities in the international capital markets including exchanges and Over the Counter ("OTC") markets. The Company also conducts investment activities in different types of bonds.

BrokerCreditService Structured Products Plc acts as the Ultima World Group's operational company in Cyprus. In collaboration with other entities which are under common control, it issues structured products and executes various hedging strategies with the purpose of generating margins and minimising risk. Specifically, the Company issues Notes in registered form (respectively, the "Notes") under a Euro Medium Term Note Programme, which are admitted to the official list of the Irish Stock Exchange and trading on its regulated market (the "Main Securities Market") as well as other and/or further stock exchange(s) or market(s) (including regulated markets). The Company also issues unlisted Notes and/or Notes not admitted to trading on any market.

The Company's ultimate shareholder and controlling party is Mr. Oleg Mikhasenko, an individual who is the sole ultimate beneficial owner of the Ultima World Group.

Review of current position, future developments and performance of the Company's business

The Company's development to date, financial results and position as presented in the financial statements are considered satisfactory.

Given the current geopolitical situation, which affects world markets the Board of Directors is aiming to continue to take the following measures to ensure stability of Company's business, its financial position and performance:

- Continue with new markets expansion – for limiting exposures to the markets the Company is present at, the Board of Directors considers expansion to new markets;
- Completely cease offering the structured products in Russia and focus offering products of the Company at different new markets;
- Due to constantly changing geopolitical environment company continuously seeking for a new business relations and opportunities to ensure stability in company's performance to be able to fulfil its obligations.

The Company's strategic goals and main current and future developing points are:

- Leading positions in sales of structured products;
- Ability for remote purchase of structured products;
- Continue to increase range of structured products provided;

- Continue of implementation of new types of products;
- Sales diversification through partners and agents and development of remote and other distribution channels (i.e. promotion of online distribution of structured products through The Ultima channels, external partnership network extension, and joint products with other entities under common control).

Existence of branches

The Company does not maintain any branches.

Principal risks and uncertainties

The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company as part of its operations and normal activities uses various financial instruments such as credit default swaps, interest rate swaps, options, forward contracts, direct and reverse repurchase agreements, credit linked notes and other instruments which expose it to various financial risks such as fair value interest rate risk, credit risk, liquidity risk.

The Company's risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, and credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

Market risk

Market price risk is the risk of loss resulting from adverse movements in the market price or model price of financial assets. The Company has an exposure to market price risk because of investments held by the Company and classified as financial assets at fair value through profit or loss, which are susceptible to market price risk arising from uncertainties about future prices of these investments.

Interest rate risk

Interest rate risk is the risk of adverse movements in the yield curve and corresponding movements in the valuation of fixed income-based assets of the Company.

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to meet an obligation. The Company distinguishes between the following types of credit risk:

- Counterparty credit risk is the risk of the counterparty defaulting on a derivative transaction that has a positive replacement value;
- Issuer credit risk is the risk of default by the issuer of a debt instrument held as direct position or as an underlying of a derivative;
- Country risk is the risk of financial loss due to a country-specific event.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulties with raising money in meeting obligations associated with financial liabilities.

Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognized assets and liabilities are denominated in a currency that is not the Company's functional currency.

The principal financial risks above and uncertainties faced by the Company are described further in note 5 of the financial statements. These risks are not an exhaustive list or explanation of all risks, which the Company may face.

The Company is also exposed to a number of other risks, including:

- **Operational Risk** is the risk of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from external events. Losses can take the form of direct financial losses, regulatory sanctions or lost revenues, e.g. due to the failure of a system. Such events may also lead to reputational damage that could have longer-term financial consequences. Operational risk is limited by means of organizational measures, automation, internal control and security systems, written procedures, legal

documentation, loss mitigation technics and business continuity plan overseen by management, among other measures.

- **Legal risk** is the risk that agreements and contracts are ineffective in protecting the Company's from claims against it by third parties.
- **Regulatory Compliance Risk** - the risk that the Company suffers financial, reputational or litigation damage through failure to adhere to, monitor, control update and eliminate or substantially reduce regulatory compliance risk.
- **IT Risk** (including Cyber risks) is the risk that IT systems fail to support the Company's business operations and/or to provide reliable management information on a timely basis.
- **Reputation risk** is the current or prospective risk to earnings and capital arising from an adverse perception of the image of the Company on the part of counterparties, shareholders, investors or regulators. Reputation risk could be triggered by poor performance, fraud, theft, legal action or regulatory fines.
- **Political risk** is the risk that the Company's investment's returns or operations could suffer as a result of political changes in the country or globally.
- **Model risk** is the risk of financial loss due to inappropriate model assumptions or inadequate model usage. The consequence of an inadequate model could be an incorrect valuation, leading to incorrect risk measurement and incorrect hedging positions, both of which could result in a financial loss.
- **Tax risk** is the risk of losses arising from changes in taxation (derived from tax legislation and decisions by the courts), including the misinterpretation of tax regimes as well as the manner in which they may be applied and enforced.

All significant risks are included in the Risk Matrix of the Company with a description of the procedures for their mitigation.

Capital adequacy

The Company maintains a significant level of capital due to the following factors:

- This allows the Company to better manage risks in stressful situations and absorb adverse market movements;
- This makes it easier to establish relationships with leading market counterparties;
- This corresponds to the best market practices.

Due to its strong capital base, the Company's risk appetite falls into the categories between "Low" to "Medium": the Company has limited appetite for risks and therefore takes preference to safe options that are low risk. The Company makes some deliberate trade-offs between costs and return considerations and accepts some risk exposure whilst designing controls with an emphasis on mitigating risks that are more material.

The Company's capital amounted to USD 118 280 thousand as at 31 December 2024 (31 December 2023: USD 128 300 thousand).

Results

The Company's results for the year ended 31 December 2024 are set out on page 16. The net loss for the year ended 31 December 2024 attributable to the shareholder of the Company amounted to USD 2 695 thousand. (2023: net profit USD 13 613 thousand). As at 31 December 2024 the total assets of the Company were USD 517 109 thousand (31 December 2023: USD 964 389 thousand) and the net assets of the Company were USD 118 280 thousand (31 December 2023: USD 128 300 thousand). In 2022 the imposition of sanctions introduced restrictions over trading and resulted in increased impairment provisions and losses over trading assets. As a result of the sanctions receivables are restricted over trading and movements in depositaries. In 2024, the management applied a more conservative approach to the valuation of provisions for restricted assets, which resulted in additional expenses in the amount of USD 28 725 thousand (31 December 2023: USD 41 750 thousand).

Key Performance Indicators

Although the Company incurred losses during the year ended 31 December 2024, this was the result of the applying a more conservative approach to the valuation of reserves and trading assets. Despite the loss the Company maintained

strong equity position amounted to USD 122 376 thousand as at 31 December 2024 (31 December 2023: USD 128 300 thousand), representing 30% of the Company's total liabilities (31 December 2023: 15%).

Dividends

During the year ended 31 December 2024 the Company did not declare and pay dividends (2023: USD 0 thousand).

Share capital

There were no changes in the share capital of the Company during the reported period.

Board of Directors

The members of the Company's Board of Directors as at 31 December 2024 and at the date of this report are presented on page 1. Mr. Sergei Kaminskii was appointed on the Directors' position of the Company as at 16 July 2024.

In accordance with the Company's Articles of Association all Directors presently members of the Board continue in office. There were no significant changes in the assignment of responsibilities and remuneration of the Board of Directors.

Corporate Governance Statement

The Company, in preparation of its financial reports adheres to IFRS requirements laid down by the International Accounting Standards (IAS) Regulation (2002/3626/EC) and Companies Law Cap. 113 of the Republic of Cyprus. The financial reports are prepared in accordance with International Financial Reporting Standards as adopted by the EU. The procedure of preparation of financial statements information in terms of risk management and internal controls is supervised by the Board of Directors. The Company also has an Audit Committee, appointed directly by the General Meeting of Shareholders which is entitled, under its documented Terms of Reference to:

- (a) monitor and discuss with management the integrity of the financial statements of the Company, including:
 - (i) the annual and half-yearly reports;
 - (ii) any other formal statements relating to its financial performance;
- (b) review and report to the board on significant financial reporting issues and judgements which the financial statements, condensed interim financial information, preliminary announcements and related formal statements contain having regard to matters communicated to it by the external auditor;
- (c) review and challenge where necessary:
 - (i) the application and appropriateness of accounting policies, and any changes to them both on a year on year basis and across the Company;
 - (ii) the annual valuations used for preparation of the annual financial statements and, at its discretion, to interview the valuers responsible for such valuations, if any;
 - (iii) whether the Company has made appropriate estimates and judgements, taking into account the external auditor's views;
 - (iv) the clarity and completeness of financial reporting disclosures and any changes to those disclosures, including the review of any correspondence between the Company and the external auditor;
 - (v) the methods used to account for significant or unusual transactions (including any off balance sheet arrangements) where different approaches are possible;
 - (vi) significant adjustments resulting from the external audit; and
 - (vii) the assumptions or qualifications in support of the going concern statement (including any material uncertainties as to the Company's ability to continue as a going concern over a period of at least twelve months from the date of approval of the financial statements) and the longer term viability statement (including an assessment of the prospects of the Company looking forward over an appropriate and justified period);
- (d) monitor compliance with financial reporting standards and any recognised investment exchange and other financial and governance reporting requirements;
- (e) review all material information presented with the financial statements, such as the strategic report and the corporate governance statements, insofar as it relates to audit and risk management;
- (f) review first any other statements that contain financial statements and require board approval, if carrying out a review before board approval would be practicable and consistent with any prompt reporting requirements under any law or regulation including the listing rules or disclosure guidance and transparency rules; and

(g) where the Committee is not satisfied with any aspect of the proposed financial reporting by the Company, report its views to the board.

As to the internal controls the Audit Committee reviews the Company's internal financial controls and internal control systems and, at least annually, carry out a review of its effectiveness and approve the statement to be included in the annual report concerning internal control.

Operating Environment of the Company

Operating Environment of the Republic of Cyprus

Economic Performance

In 2023 GDP growth rate reached 2,4 %, while inflation stands at 3,9 %. In 2024 economic conditions remain positive, the GDP growth rate in real terms during 2024 is estimated at 3,4% according to the Central Bank of Cyprus (CBC).

The CBC has revised its 2025 forecast for gross domestic product growth to 3,2 %, from 3,1% compared to its December 2024 projections. At the same time, it has maintained its forecast for GDP growth in the period 2026-2027 at 3.1% annually.

Key Risks & Challenges

1. Geopolitical Tensions & External Risks

- Escalating Middle East crisis threatens global stability, potentially increasing energy prices and transportation costs, which could reignite inflationary pressures.
- Continued Russia-West tensions and broader global economic uncertainty may impact foreign direct investment (FDI) and tourism inflows, particularly from MENA-based firms.

2. Inflation & Monetary Policy

- Inflation remains a concern, though moderated compared to 2023. Any further supply-chain disruptions or energy price shocks could reverse progress.
- The European Central Bank's (ECB) monetary policy will influence Cyprus' borrowing costs and economic stability.

3. Banking Sector & Fiscal Resilience

- Cyprus has made significant progress in reducing banking sector risks since the financial crisis.
- Sovereign credit ratings improved:
 - Fitch (December 2024): Upgraded to A- (Positive Outlook) from BBB.
 - S&P (December 2024): Upgraded to A- from BBB.
- However, high private and public debt levels remain a vulnerability, requiring continued fiscal discipline.

Outlook for 2025-2026

- The CBC projects steady but slower growth in 2025-2026, assuming no major external shocks.
- Tourism, real estate, and professional services remain key drivers, but diversification efforts (e.g., tech investments, energy projects) are crucial for long-term resilience.

Conclusion

Cyprus' economy shows strong momentum in 2024, supported by domestic demand and improved fiscal health. However, geopolitical risks, inflation pressures, and global economic fragility pose significant challenges. The country's ability to maintain fiscal discipline, attract FDI, and navigate external shocks will determine its economic trajectory in the coming years.

Total auditors' remuneration

Total auditors' remuneration for the year ended 31 December 2024 amounted to USD 290 thousand (2023: USD 352 thousand).

Events after the reporting period

The events after the reporting period are disclosed in Note 23 to the financial statements.

Related party balances and transactions

Disclosed in Note 21 of the financial statements.

Independent Auditors

The Independent Auditors, Yiallourides & Partners Ltd, have expressed their willingness to continue in office. A resolution giving authority to the Board of Directors to fix their remuneration will be submitted to the Annual General Meeting.

Alona Joannu
Managing Director

Limassol, 28 April 2025

Independent Auditor's Report

To the Members of BrokerCreditService Structured Products Plc

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of BrokerCreditService Structured Products Plc (the "Company"), which are presented in pages 15 to 53 and comprise the statement of financial position as at 31 December 2024, and the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes of the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2024, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113.

Basis for Opinion

We conducted our audit in accordance with the International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the 'Auditor's Responsibilities for the Audit of the Financial Statements' section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Cyprus, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to notes 13 and 16 of the financial statements which describe the recent developments in business operating environment, as a result of the political situation between Russia and Ukraine, and how the restrictions introduced as a result of the imposed sanctions affected the reported accounts of Company's assets and liabilities and its operations. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in Emphasis of matter paragraph, we have determined the matters described below to be key audit matters to be communicated in our report.

Independent Auditor's Report (continued)

To the Members of BrokerCreditService Structured Products Plc

Key Audit Matters (continued)

Valuation of derivatives notes issued, trading assets and liabilities measured at fair value Level 2 and Level 3

Refer to note 13, 14, 17 and 20 of the financial statements.

The key audit matter

Fair value of derivatives and notes issued is calculated with the use of valuation models that are often based on subjective assumptions and management's professional judgement.

Due to existence of an uncertainty factor inherent in fair value of derivatives and notes issued, we consider this area a key audit matter.

How the matter was addressed in our audit

Our audit procedures in this area included, among others:

We evaluated the appropriateness of the accounting policies applied by the Company.

We involved valuation specialists to analyze the appropriateness and reasonableness of the valuation models and assumptions used by the Company and to develop an independent expectation for a sample of derivatives and notes issued. We compared independent expectation with valuations calculated by the client.

For a sample of derivatives and notes issued we tested the correctness of data inputs used for fair value estimation with data and supporting documents.

We uploaded the data for a sample selected to the Software used for valuation and compare the valuation results with those calculated by the client.

We tested market data used in the calculation of the fair value by reconciliation with information from external resources on a sample basis.

We also assessed whether the financial statements provide an appropriate disclosure related to the fair value of the Company's derivatives and notes issued.

We discussed with the Management of the Company over significant assumptions in relation to the marketability discounts applied in measuring the fair value of trading assets.

Independent Auditor's Report (continued)

To the Members of BrokerCreditService Structured Products Plc

Key Audit Matters (continued)

Impairment of debt financial assets

Refer to note 16 of the financial statements

The key audit matter

A financial asset or contract is not appropriately identified for a loss allowance based on expected credit losses (ECLs).

An inappropriate amount is estimated and recorded for the ECL allowance for financial assets or contracts in scope of IFRS 9's impairment requirements.

The definition of default is not appropriately determined or consistently applied.

Significant increase in credit risk (SICRP) is inappropriately assessed or applied, leading to assets being allocated to incorrect stages.

How the matter was addressed in our audit

Our audit procedures in this area included, among others:

We evaluated the appropriateness of the accounting policies based on IFRS 9 requirements, our business understanding and industry practice.

We evaluated the reasonableness of Management's key judgements, including selection and application of methods/ models and significant assumptions in estimating ECLs.

We evaluated the completeness, accuracy and relevance of disclosures required by IFRS 9, including disclosures about assumptions about the future and other major sources of estimation uncertainty.

Specifically:

- For prepayments and other assets, we carried out the following:
 - We verified that the ECL assessment was carried out on an individual basis.
 - We assessed the correctness / appropriateness of the classification of receivables as Stage 1, Stage 2 and Stage 3 in accordance with the accounting policy of the Company and the characteristics of each receivable.
 - We assessed the appropriateness of the Probability of Default (PD) and Loss Given Default (LGD) used in line with the accounting policy of the Company.
 - We ensured that for 'blocked' receivables these are categorized as Stage 3.
 - We recalculated the ECL and compared it with the provision recognized by the Company, verifying by that way the mathematical accuracy of the model used by the Company.
 - We received a breakdown of the accounts receivable and categories and checked it with the registries to ensure the completeness and accuracy of the relevant data in order to check that the correct EAD is used for the calculations.
- For assets measured at amortized cost, as these are classified on the face of the balance sheet, we carried out the following:
 - We checked Company's methodology for PD calculation and verified its conformity with the IFRS 9 provisions.
 - We recalculated the ECL and compared results to those of the Company.
 - We assessed the correctness/appropriateness of the classification of the assets measured at amortized cost as Stage 1, Stage 2 and Stage 3 in accordance with the accounting policy of the Company and the characteristics of each receivable.
 - We checked that the calculation of the ECL the correct LGD and PD is applied.
 - We checked that the correct EAD is used for the calculation.

Independent Auditor's Report (continued)

To the Members of BrokerCreditService Structured Products Plc

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the Management Report, the Corporate Governance Statement and the Directors' responsibility statement, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon, except as required by the Companies Law, Cap.113.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and those charged with governance for the Financial Statements

The Board of Directors is responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors and those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.

Independent Auditor's Report (continued)

To the Members of BrokerCreditService Structured Products Plc

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal Requirements

Requirements of Article 10(2) of the EU Regulation 537/2014

1. Appointment of the Auditor and Period of Engagement

We were firstly appointed as auditors of the Company on 01 February 2024 to audit the financial statements of the Company for the year ended 31 December 2023. Our total uninterrupted period of engagement, having been renewed annually by shareholders' resolution, is 2 years covering the periods ending 31 December 2023 to 31 December 2024.

2. Consistency of the Additional Report to the Audit Committee

We confirm that our audit opinion on the financial statements expressed in this report is consistent with the additional report to the Audit Committee of the Company, which is dated 02 December 2024, in accordance with Article 11 of the EU Regulation 537/2014.

3. Provision of Non-audit Services

We declare that no prohibited non-audit services referred to in Article 5 of the EU Regulation 537/2014 and Section 72 of the Auditors Law of 2017 were provided. In addition, there are no non-audit services which were provided by us to the Company and which have not been disclosed in the financial statements or the Management Report.

Other Legal Requirements

Pursuant to the additional requirements of the Auditors Law of 2017, we report the following:

- In our opinion, the Management Report, the preparation of which is the responsibility of the Board of Directors, has been prepared in accordance with the requirements of the Cyprus Companies Law, Cap 113, and the information given is consistent with the financial statements.
- In light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we are required to report if we have identified material misstatements in the Management Report. We have nothing to report in this respect.
- In our opinion, based on the work undertaken in the course of our audit, the information included in the corporate governance statement in accordance with the requirements of subparagraphs (iv) and (v) of paragraph 2(a) of Article 151 of the Cyprus Companies Law, Cap. 113, and which is included as a specific section of the Management Report, has been prepared in accordance with the requirements of the Cyprus Companies Law, Cap, 113, and is consistent with the financial statements.

Independent Auditor's Report (continued)

To the Members of BrokerCreditService Structured Products Plc

Other Legal Requirements (continued)

- In our opinion, based on the work undertaken in the course of our audit, the corporate governance statement includes all information referred to in subparagraphs (i), (ii), (iii), (vi) and (vii) of paragraph 2(a) of Article 151 of the Cyprus Companies Law, Cap. 113.
- In light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we are required to report if we have identified material misstatements in the corporate governance statement in relation to the information disclosed for items (iv) and (v) of subparagraph 2(a) of Article 151 of the Cyprus Companies Law, Cap. 113. We have nothing to report in this respect.

European Single Electronic Format

We have examined the digital files of the European Single Electronic Format (ESEF) of BrokerCreditService Structured Products Plc for the year ended 31 December 2024 comprising the XHTML file which includes the annual financial statements for the year then ended (the "digital files").

The Board of Directors of BrokerCreditService Structured Products Plc is responsible for preparing and submitting the financial statements for the year ended 31 December 2024 in accordance with the requirements set out in the EU Delegated Regulation 2019/815 of 17 December 2018 of the European Commission (the "ESEF Regulation").

Our responsibility is to examine the digital files prepared by the Board of Directors of BrokerCreditService Structured Products Plc. According to the Audit Guidelines issued by the Institute of Certified Public Accountants of Cyprus (the "Audit Guidelines"), we are required to plan and perform our audit procedures in order to examine whether the content of the financial statements included in the digital files corresponds to the financial statements we have audited, and whether the digital files have been prepared in all material respects, in accordance with the requirements of the ESEF Regulation.

In our opinion, the digital files examined correspond to the financial statements, and the financial statements included in the digital file are presented in all material, in accordance with the requirements of the ESEF Regulation.

Other Matters

This report, including the opinion, has been prepared for and only for the Company's members as a body in accordance with Section 69 of the Auditors Law of 2017 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whose knowledge this report may come to.

1 Background

Country of incorporation

The company BrokerCreditService Structured Products Plc (the "Company") was incorporated in Cyprus on 18 March 2005 as a private limited liability company under the provisions of the Cyprus Companies Law, Cap. 113. In 2015 the Company has been converted into a public limited company. Its registered office is at office is at Agias Fylaxeos 182, Office 203, Kofteros Business Center, 3083 Limassol, Cyprus.

Principal activities

The Company constitutes an integral part of a wider group of companies (that might be also referred to in public sources as The Ultima World Group or The Ultima World Financial Group or The Ultima World), the top level holding company of the above mentioned being THE ULTIMA WORLD DMCC (till 9 January 2025 FG BCS LTD DMCC) (domiciled in United Arab Emirates). The above mentioned The UltimaWorld Group has full ownership and exercises control over a number of legal entities including those duly licensed and authorised for financial market services and investment activities, the appropriate licences and authorisations duly issued by EU and third countries regulators and authorities. BrokerCreditService Structured Products Plc acts as an investment and financing company and conducts trading operations in the international securities markets (except for the investment activity that requires authorisation and/or license). This includes entering into transactions with market counterparties and related parties that are members of the The Ultima World Group. These transactions include, but are not limited to, repo transactions, loans and transactions with securities in the international capital markets including exchanges and Over the Counter ("OTC") markets. The Company also conducts investment activities in different types of bonds.

BrokerCreditService Structured Products Plc acts as The Ultima World Group's operational company in Cyprus. In collaboration with other entities which are under common control, it issues structured products and executes various hedging strategies with the purpose of generating margins and minimising risk. Specifically, the Company issues Notes in registered form (respectively, the "Notes") under a Euro Medium Term Note Programme, which are admitted to the official list of the Irish Stock Exchange and trading on its regulated market (the "Main Securities Market") as well as other and/or further stock exchange(s) or market(s) (including regulated markets). The Company also issues unlisted Notes and/or Notes not admitted to trading on any market.

As at 31 December 2024 and 31 December 2023 the Company had no subsidiaries.

The Company's ultimate shareholder and controlling party is Mr. Oleg Mikhasenko, an individual who is the sole ultimate beneficial owner of The Ultima World Group.

Business environment

Cyprus business environment

Operating Environment of the Republic of Cyprus

In 2023 GDP growth rate reached 2,4 %, while inflation stands at 3,9 %. In 2024 economic conditions remain positive, the GDP growth rate in real terms during 2024 is estimated at 3,4% according to the Central Bank of Cyprus (CBC).

The CBC has revised its 2025 forecast for gross domestic product growth to 3,2 %, from 3,1% compared to its December 2024 projections. At the same time, it has maintained its forecast for GDP growth in the period 2026-2027 at 3.1% annually.

Inflation (based on the Consumer Price Index) decelerated to 1.8% in 2024 and is expected to remain at similar levels in 2025 and 2026. Inflation is projected at 1.7% in 2025, down by 0.4 percentage points compared to the October issue, as inflation surprised on the downside in the fourth quarter of 2024. In 2026, inflation is forecast at 1.6%. The inflation outlook is influenced by the recent declines in international oil prices, the deceleration of inflation in the second half of 2024, the still restrictive financing conditions in Cyprus, and easing selling price expectations, particularly in services.

Nevertheless, uncertainty around the macroeconomic outlook remains high due the challenging external environment. There are heightened geopolitical tensions between the world's largest economies adding uncertainty to the global economy outlook. Tensions between Russia and the West also remain high. Middle East crisis adds to the current global economic uncertainty, posing a threat to the global and local economy short-term path via the possibility of new inflationary pressures (increase of transportation costs and energy prices), slowing down of foreign direct investment and tourist inflows in Cyprus from MENA owned firms.

There have been distinct improvements in Cyprus' risk profile after the banking crisis, substantial risks remain. Cyprus' overall country risk is a combination of sovereign, currency, banking, political and economic structure risk, influenced by external developments with substantial potential impact on the domestic economy.

The sovereign risk ratings of the Cyprus Government improved considerably in recent years reflecting reduced banking sector risks, and improvements in economic resilience and consistent fiscal outperformance. In December 2024, Fitch Ratings has upgraded Cyprus's Long-Term Foreign-Currency Issuer Default Rating (IDR) to 'A-' from 'BBB+'. The Outlook is Stable. In December 2024, S&P Global Ratings raised its long-term foreign and local currency sovereign credit ratings on the Republic of Cyprus to 'A-' from 'BBB+'. In November 2024, Moody's has upgraded the Government of Cyprus's long-term issuer and senior unsecured ratings to A3 from Baa2.

2 Basis of preparation

Statement of compliance

These financial statements are prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB), as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113.

Basis of measurement

These financial statements are prepared on the historical cost basis, except for trading assets and liabilities, including derivatives, certain notes issued.

Functional and presentation currency

The functional currency of the Company is the currency of the primary economic environment in which it operates. The Company has determined that its functional currency is USD as it reflects the economic substance of the majority of its underlying events and circumstances. The USD is also the presentation currency for the purposes of these financial statements. All financial information presented in USD is rounded to the nearest thousands, unless otherwise indicated.

Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the amounts recognised in the financial statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Judgements that have the most significant effect on the amounts recognised in the financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Judgments

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

- classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding – Note 3;
- establishing the criteria for determining whether credit risk on the financial asset has increased significantly since initial recognition, determining methodology for incorporating forward-looking information into measurement of ECL and selection and approval of models used to measure ECL – Note 5.

Assumptions and estimations uncertainty

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment is included in the following notes:

- impairment of financial instruments: determining inputs into the ECL measurement model, including incorporation of forward-looking information – Note 5;
- estimates of fair values of financial assets and liabilities – Note 20.

Changes in accounting policies and presentation

The following new standards are effective from 1 January 2024:

- Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants - Amendments to IAS 1.
- Lease Liability in a Sale and Leaseback – Amendments to IFRS 16.
- Disclosures: Supplier Finance Arrangements - Amendments to IAS 7 and IFRS 7.

The Company has not early adopted any other standards, interpretations or amendments that has been issued but is not yet effective. None of these amendments will have an impact on the Company's financial statements at 31 December 2024.

3 Material accounting policies

The Company has consistently applied the following accounting policies to all periods presented in these financial statements.

Foreign currency

Transactions in foreign currencies are translated to the functional currency of Company at the spot exchange rate at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated into the functional currency at the spot exchange rate at that date.

The foreign currency gain or loss on monetary items is the difference between amortized cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortized cost in foreign currency translated at the spot exchange rate at the end of the period. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the spot exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognized in profit or loss, except for those arising on financial instruments at FVTPL, which are recognised as a component of net income from financial instruments at FVTPL.

Net trading gain (loss) from trading assets and liabilities

'Net trading gain (loss)' comprises gains less losses related to trading assets and liabilities, and includes all fair value changes, and interest income on trading assets and realized gains less losses on investment securities.

Dividend income

Dividend income is recognised in profit or loss on the date which the right to receive payment is established. For quoted equity securities, this is usually the ex-dividend date. For unquoted equity securities, this is usually the date on which the shareholders approve the payment of a dividends.

Fees and commission

Fee and commission expense that are integral to the effective interest rate on a financial asset or financial liability are included in the effective interest rate. Other fee and commission expenses relate mainly to transaction and service fees, which are expensed as the services are received.

Financial assets and financial liabilities

Designation at fair value through profit or loss

Financial assets

At initial recognition, the Company has designated certain financial assets as at FVTPL because this designation eliminates or significantly reduces an accounting mismatch, which would otherwise rise. A description of the basis for each designation is set out in the note for the relevant asset class.

Investment securities

The 'investment securities' caption in the statement of financial position includes:

- debt securities measured at amortised cost; and
- equity investment securities designated as at FVTPL.

Financial liabilities

The Company has designated certain financial liabilities as at FVTPL in either of the following circumstances:

- the liabilities are managed, evaluated and reported internally on a fair value basis; or
- the designation eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Embedded derivatives

Derivatives may be embedded in another contractual arrangement (a host contract). The Company accounts for an embedded derivative separately from the host contract when:

- the host contract is not an asset in the scope of IFRS 9;
- the host contract is not itself carried at FVTPL;
- the terms of the embedded derivative would meet the definition of a derivative if they were contained in a separate contract; and
- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract.

Separated embedded derivatives are measured at fair value, with all changes in fair value recognised in profit or loss unless the Company chooses to designate the hybrid contracts at FVTPL.

Notes issued

The 'Notes issued' caption in the statement of financial position includes debt securities in issue designated at FVTPL.

Derivatives

The 'Derivatives' captions in the statement of financial position includes debt securities include various derivative contracts which may be hybrid financial liabilities designated at FVTPL.

Liabilities designated as at FVTPL

When the Company designates a financial liability as at FVTPL, the amount of change in the fair value of the liability that is attributable to changes in its credit risk is presented in other comprehensive income as a liability credit reserve. On initial recognition of the financial liability, the Company assesses whether presenting the amount of change in the fair value of the liability that is attributable to credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. This assessment is made by using a regression analysis to compare:

- the expected changes in the fair value of the liability related to changes in the credit risk; with
- the impact on profit or loss of expected changes in fair value of the related instruments.

Amounts presented in the liability credit reserve are not subsequently transferred to profit or loss. When these instruments are derecognised, the related cumulative amount in the liability credit reserve is transferred to retained earnings.

The change in fair value attributable to changes in credit risk is determined as the amount of change in its fair value that is not attributable to changes in observed benchmark interest rate. In absence of specific observable data this approach provide a reasonable approximation of changes in attributable to credit risk.

Dividends

Dividend distribution to the Company's shareholders is recognised in the Company's financial statements when the shareholders' right to receive the dividends is established, either through Board resolution (for interim dividends) or by the Company's shareholders in the Annual General Meeting (for final dividends).

Income and expense recognition

Other than described in Note 3 income and expense items are generally recorded on an accrual basis by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided.

Current income tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Associates

Associates are those entities in which the Company has significant influence, but not control, over the financial and operating policies. The financial statements include the Company's share of the total recognised gains and losses of associates on an equity accounted basis, from the date that significant influence effectively commences until the date that significant influence effectively ceases. When the Company's share of losses exceeds the Company's interest (including long-term loans) in the associate, that interest is reduced to nil and recognition of further losses is discontinued except to the extent that the Company has incurred obligations in respect of the associate.

4 New standards and interpretations not yet adopted

The following new standards, amendments to standards, and interpretations are not yet effective as at 31 December 2024, and are not applied in preparing these financial statements. The Company plans to adopt these pronouncements when they become effective.

- Amendments to the Classification and Measurement of Financial Instruments—Amendments to IFRS 9 and IFRS 7. The Amendments are effective for annual periods starting on or after 1 January 2026.
- IFRS 18 Presentation and Disclosure in Financial Statements. IFRS 18, and the amendments to the other standards, are effective for reporting periods beginning on or after 1 January 2027, but earlier application is permitted and must be disclosed. IFRS 18 will apply retrospectively.
- Lack of exchangeability – Amendments to IAS 21. The amendments will be effective for annual reporting periods beginning on or after 1 January 2025. Early adoption is permitted, but will need to be disclosed. When applying the amendments, an entity cannot restate comparative information.
- IFRS 19 Subsidiaries without Public Accountability: Disclosures. IFRS 19 will become effective for reporting periods beginning on or after 1 January 2027, with early application permitted.

The amendments and new standards are not expected to have a material impact on the Company's financial statements.

5 Risk management

Overview

The Company's business activities expose it to a variety of financial risks, including market, credit, liquidity risks, and non-financial risks, including technology, operations, legal, and reputational risks. Identification and management of these risks are essential to the success and financial soundness of the Company. This note presents information about the Company's exposure to these risks, its objectives, policies and processes for measuring and managing risks.

Senior management takes an active role in the risk management process and has policies and procedures under which specific business and control units are responsible for identifying, measuring, and controlling various risks. Oversight of risk management is delegated to the Head of Risk department, which is responsible for reviewing and monitoring risk exposures and leading the continued development of risk management policies and practices. The Head of Risk department focuses on these specific areas:

- credit and market risk, focusing on credit exposures resulting from hedging transactions, investing activities of certain proprietary funds, corporate credit and investment activity, and market risk resulting from the Company taking positions in certain securities to facilitate hedging activity;
- corporate asset-liability management, focusing on liquidity, capital resources, interest rate risk, and investments;
- information security and privacy, focusing on information security and privacy policies, procedures and controls;
- investment management, focusing on activities in which the Company and its principals operate in an investment advisory capacity;
- operational risk management, focusing on risks relating to potential inadequate or failed internal processes, people and systems, and from external events and relationships (e.g., vendors and business partners).

The Head of Risk department reviews major risk exposures and reports regularly to the Board of Directors. Management has written policies and procedures that govern the conduct of business by employees, relationships with counterparties and vendors.

Risk is inherent in the Company's business. Consequently, despite efforts to identify areas of risk and implement risk management policies and procedures, there can be no assurance that the Company will not suffer unexpected losses due to operating or other risks.

Financial risk management

Financial risks are risks arising from financial instruments to which the Company is exposed during or at the end of the reporting period. Financial risk comprises market risk (including interest rate risk, currency risk and other price risk), credit risk and liquidity risk. The primary objectives of the financial risk management function are to establish risk limits, and then ensure that exposure to risks stays within these limits.

Market risk

Market price risk is the risk of loss resulting from adverse movements in the market price or model price of financial assets. The Company has an exposure to market price risk because of investments held by the Company and classified as financial assets at fair value through profit or loss, which are susceptible to market price risk arising from uncertainties about future prices of these investments.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company takes on exposure to the effects of fluctuations in prevailing market interest rates on its financial position and cash flows. Interest rate risk management through monitoring of the mismatch of the maturities of interest bearing assets and interest-bearing liabilities is supplemented by monitoring the sensitivity of financial assets and liabilities to various standard and non-standard interest rate scenarios. Standard scenarios include a 100 basis points rise or fall in the greater than 12-month portion of all yield curves. Risk management sets limits and regularly reviews reports and issues on interest rate risks.

A summary of the interest rate gap position for financial instruments at 31 December 2024 and 31 December 2023 is as follows:

	31 December 2024						
<i>(In thousands of USD)</i>	Carrying amount	Less than 1 month	From 1 to 3 months	From 3 to 6 months	From 6 to 12 months	More than 1 year	Non-interest-bearing

An analysis of sensitivity of profit or loss and equity (net of taxes) to changes in interest rates based on a simplified scenario of a 100 bp parallel fall or rise in all yield curves and positions of interest-bearing assets and liabilities existing at 31 December 2024 and 31 December 2023 is as follows:

<i>(In thousands of USD)</i>	31 December 2024		31 December 2023	
	Profit or loss	Equity	Profit or loss	Equity
Parallel increase in rates by 100 basis points	(1 079)	(1 079)	(4 010)	(4 010)
Parallel decrease in rates by 100 basis points	1 079	1 079	4 010	4 010

The tables below presents average interest rates on interest bearing instruments based on reports reviewed by key management personnel. These interest rates are an approximation of the yields to maturity of these assets and liabilities.

<i>In % p.a.</i>	31 December 2024

Foreign currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognized assets and liabilities are denominated in a currency that is not the Company's functional currency.

The Company manages foreign currency risk by matching its principal cash outflows to the currency in which the principal cash inflows are denominated. This is generally achieved by obtaining financing in the relevant currency and by entering into forward foreign exchange contracts. The Company operates internationally and is exposed to foreign exchange risk, primarily with respect to the RR, CNY and EUR.

The table below summarises the exposure to foreign currency exchange rate risk at the end of the reporting periods:

<i>(In thousands of USD)</i>	31 December 2024					
	USD	EUR	RR	CNY	Other	Total
Financial assets	460 803	5 943	10 651	3 494	3 909	484 800
Financial liabilities	(385 198)	125	(8 991)	(4 572)	(61)	(398 697)
Net position	75 605	6 068	1 660	(1 078)	3 848	86 103

<i>(In thousands of USD)</i>	31 December 2023					
	USD	EUR	RR	CNY	Other	Total
Financial assets	825 860	29 697	11 033	46 177	16 548	929 315
Financial liabilities	(776 766)	(3 484)	(8 715)	(47 862)	867	(835 960)
Net position	49 094	26 213	2 318	(1 685)	17 415	93 355

The following significant exchange rates are applied as at and during the reporting periods:

<i>(In thousands of USD)</i>	31 December 2024		31 December 2023	
	Average rate	Spot rate	Average rate	Spot rate
EUR	1,082	1,042	1,081	1,104
RUB	0,011	0,010	0,012	0,011
CNY	0,139	0,137	0,141	0,141

The strengthening or weakening of the US dollar, as indicated below, against the Russian Rouble, Euro and Chinese Yuan at 31 December 2024 and 31 December 2023 would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is on net of tax basis and is based on foreign currency exchange rate variances that the Company considered to be reasonably possible at the reporting date. The analysis assumes that all other variables, in particular interest rates, remain constant.

<i>(In thousands of USD)</i>	31 December 2024		31 December 2023	
	Weakening	Strengthening	Weakening	Strengthening
	Profit or loss/ Equity	Profit or loss/ Equity	Profit or loss/ Equity	Profit or loss/ Equity
EUR (20% movement)	1 214	(1 214)	5 243	(5 243)
RUB (20% movement)	332	(332)	464	(464)
CNY (20% movement)	(216)	216	(337)	337

Other price risks

Equity securities price risk. Price risk for equity securities is the risk of changes in value of a financial instrument as a result of changes in market prices regardless of whether they have been caused by factors specific for a particular instrument or factors influencing all instruments traded in the market. Price risk for equity securities exists when the Company has a long or short position in an equity financial instrument.

The analysis of sensitivity of net profit or loss and equity for the year to fluctuations in securities quotations (based on positions existing at 31 December 2024 and 31 December 2023, excluding equity portfolio of USD 205 915 thousand at 31 December 2024 and equity portfolio of USD 590 627 thousand at 31 December 2023, which are used to hedge equity price risk of structured derivative products, and a simplified scenario of a 10% decrease or increase in securities quotations), all other parameters held constant, can be presented as follows:

<i>(In thousands of USD)</i>	31 December 2024		31 December 2023	
	Profit or loss	Equity	Profit or loss	Equity
10% increase in securities quotations	638	638	2 020	2 020
10% decrease in securities quotations	(638)	(638)	(2 020)	(2 020)

In the event of changes in securities quotations by 7.5%-10% / 15%-20% and market volatility by 13.7%-25.7% / 19.7%-34.5% effect of revaluation of equity portfolio used to hedge equity price risk of structured derivative products and revaluation of these structured derivative products on the Company's net profit for the year would be the following:

<i>(In thousands of USD)</i>	31 December 2024		31 December 2023	
	Profit or loss	Equity	Profit or loss	Equity
Increase in securities quotation 7.5%-10%. Market volatility is 13.7%-25.7%	8 600	8 600	19 108	19 108
Decrease in securities quotation 15%-20%. Market volatility is 19.7%-34.5%	(18 831)	(18 831)	(33 673)	(33 673)

The majority of investments classified as at fair value through profit or loss are listed on the largest exchanges such as New York Stock Exchange, NASDAQ, Shanghai Stock Exchange and others.

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to meet an obligation. The Company distinguishes between the following types of credit risk:

- Counterparty credit risk is the risk of the counterparty defaulting on a derivative transaction that has a positive replacement value;
- Issuer credit risk is the risk of default by the issuer of a debt instrument held as direct position or as an underlying of a derivative;
- Country risk is the risk of financial loss due to a country-specific event.

The Board of Directors has delegated responsibility for the oversight of credit risk to the Head of Risk department. The Risk Department is responsible for management of credit risk, including formulating credit policies, covering collateral requirements, credit assessment, reviewing and assessing credit risk, limiting concentrations of exposure to counterparties, and by issuer, credit rating bands, market liquidity and country (for trading assets), and reviewing compliance of business units with agreed exposure limits. Collateral arrangements relating to securities lending agreements, and resale agreements include provisions that require additional collateral in the event that market fluctuations result in declines in the value of collateral received. Management regularly reviews asset quality including concentrations, delinquencies, non-accrual loans, charge-offs, and recoveries. All are factors in the determination of an appropriate allowance for loan losses, which is reviewed quarterly by senior management. The Company is subject to concentration risk if it extends large loans to or have large commitments with a single counterparty, issuer, borrower, or group of similar counterparties or borrowers (e.g. in the same industry). Receivables from and payables to clients and securities borrowing and lending activities are conducted with a large number of clients and counterparties and potential concentration is carefully monitored. Management seeks to limit this risk through careful review of the underlying business and the use of limits established by senior management, taking into consideration factors including the financial strength of the counterparty (issuer), the size of the position or commitment, the expected duration of the position or commitment and other positions or commitments outstanding. The analysis by credit quality of financial assets is mainly based on Standard and Poor's rating and other ratings converted to the nearest equivalent to the Standard and Poor's rating scale. The exposure to credit risk is managed through regular analysis of the credit quality of issuers, counterparties and potential counterparties by changing limits where appropriate. Credit risk limits are a key controlling instrument to ensure the Company manages its risk within the defined risk appetite and minimises potential losses whilst maximising returns. The policy below represents information about the Company's inputs, assumptions and techniques used for estimating impairment.

Significant increase in credit risk

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the remaining lifetime probability of default (PD) as at the reporting date; with
- the remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations).

The Company uses three criteria for determining whether there has been a significant increase in credit risk:

- quantitative test based on movement in probability of default (PD);
- qualitative indicators; and
- backstop of 30 days past due, except for transactions with financial institutions or issuer of securities, for which a backstop of 1 day past due is applied.

Credit risk grades

The Company allocates each exposure to a credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower. Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each exposure is allocated to a credit risk grade at initial recognition based on available information about the borrower.

Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The monitoring typically involves use of the following data.

Corporate exposure

-
- | | |
|--|--|
| • Information obtained during periodic review of customer files – e.g. audited financial statements, management accounts, budgets and projections | • Payment record – this includes overdue status as well as a range of variables about payment ratios |
| • Data from credit reference agencies, press articles, changes in external credit ratings | • Requests for and granting of forbearance |
| • Quoted bond and credit default swap (CDS) prices for the borrower where available | • Existing and forecast changes in business, financial and economic conditions |
| • Actual and expected significant changes in the political, regulatory and technological environment of the borrower or in its business activities | |
-

Generating the term structure of PD

Credit risk grades are a primary input into the determination of the term structure of PD for exposures. The Company collects performance and default information about its credit risk exposures analysed by type of product and borrower as well as by credit risk grading.

The Company employs statistical models to analyse the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

This analysis includes the identification and calibration of relationships between changes in default rates and changes in key macro-economic factors as well as in-depth analysis of the impact of certain other factors (e.g. forbearance experience) on the risk of default. For most exposures, key macro-economic indicator is likely to be GDP growth, oil price index and retail price index.

The Company uses expert judgment in assessment of forward-looking information. This assessment is based also on external information (see discussion below on incorporation of forward-looking information). The Company then uses these forecasts to adjust its estimates of PDs.

Determining whether credit risk has increased significantly

The criteria for determining whether credit risk has increased significantly vary by portfolio and include quantitative changes in PDs and qualitative factors, including a backstop based on delinquency.

The Company will deem the credit risk of a particular exposure to have increased significantly since initial recognition if, based on the Company's quantitative modelling, the remaining lifetime PD is determined to have increased by more than one notch basis points per annum since initial recognition. In measuring increases in credit risk, remaining lifetime ECLs are adjusted for changes in maturity.

Using its expert credit judgement and, where possible, relevant historical experience, the Company may determine that an exposure has undergone a significant increase in credit risk based on particular qualitative indicators that it considers are indicative of such and whose effect may not otherwise be fully reflected in its quantitative analysis on a timely basis.

As a backstop, the Company considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due or, more than 1 day past due for transactions with financial institutions or issuer of securities. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

The Company monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default;
- the criteria do not align with the point in time when an asset becomes 30 days past due;
- the average time between the identification of a significant increase in credit risk and default appears reasonable;

Modified financial assets

The contractual terms of a loan may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing loan whose terms have been modified may be derecognised and the renegotiated loan recognised as a new loan at fair value.

When the terms of a financial asset are modified and the modification does not result in derecognition, the determination of whether the asset's credit risk has increased significantly reflects comparison of:

- its remaining lifetime PD at the reporting date based on the modified terms; with
- the remaining lifetime PD estimated based on data at initial recognition and the original contractual terms.

Definition of default

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the borrower is past due more than 90 days on any material credit obligation to the Group and 3 days past due for transactions with financial institutions or issuer of securities. Overdrafts are considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than the current amount outstanding.

In assessing whether a borrower is in default, the Group considers indicators that are:

- qualitative – e.g. breaches of covenant;
- quantitative – e.g. overdue status and non-payment on another obligation of the same issuer to the Company; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

Incorporating of forward-looking information

The Company incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL. The Company uses expert judgment in assessment of forward-looking information. This assessment is based also on external information. External information may include economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Company operates, such as the World bank, Ministry of Economic Development, and individual and academic forecasters.

Periodically, the Company carries out stress testing of more extreme shocks to calibrate its determination of these other representative scenarios.

The Company makes estimates and assumptions that affect the amounts of assets and liabilities recognised in the financial statements. Assumptions include judgements about future events that are reasonable in light of the current circumstances.

The Company has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variable and credit risk and credit losses. This key drivers for USA are GDP deflator forecasts and index S&P 500. This key driver for the other countries where the group operates is GDP deflator forecasts, Brent spot price and inflation rate.

The economic scenarios used as at 31 December 2024 included the following ranges of key indicators for the years ending 31 December 2023, 2024 and 2025.

United States	2023	2024	2025
US GDP	2,60%	2,70%	from -1,77% to 3,07%
S&P 500 1 Year Return	-19,69%	-14,24%	from -15,47% to 28,40%

EU	2023	2024	2025
Brent spot price (-2 years)	92,67 USD per Barrel	80,50 USD per Barrel	from 70 to 81 USD per Barrel
EU CPI	1,50%	2,93%	from 0,48% to 2,92%

Russia Federation	2023	2024	2025
RF GDP deflator	3,10%	3,10%	from -3,14% to 2,5%
Brent spot price	61,87 USD per Barrel	60,40 USD per Barrel	from 30 to 60,80 USD per Barrel

Measurement of ECL

The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD).

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information as described above.

PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. These statistical models are based on internally compiled data comprising both quantitative and qualitative factors. Where it is available, market data may also be used to derive the PD for large corporate counterparties. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures and estimated prepayment rates.

The Company estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. For loans secured by retail property, LTV ratios are a key parameter in determining LGD. LGD estimates are recalibrated for different economic scenarios and, for real estate lending, to reflect possible changes in property prices. They are calculated on a discounted cash flow basis using the effective interest rate as the discounting factor.

EAD represents the expected exposure in the event of a default. The Company derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortisation. The EAD of a financial asset is its gross carrying amount. For lending commitments and financial guarantees, the EAD includes the amount drawn, as well as potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts.

As described above, and subject to using a maximum of a 12-month PD for financial assets for which credit risk has not significantly increased, the Company measures ECL considering the risk of default over the maximum contractual period (including any borrower's extension options) over which it is exposed to credit risk, even if, for risk management purposes, the Company considers a longer period. The maximum contractual period extends to the date at which the Company has the right to require repayment of an advance or terminate a loan commitment or guarantee.

For portfolios in respect of which the Company has limited historical data, external benchmark information is used to supplement the internally available data. The portfolios for which external benchmark information represents a significant input into measurement of ECL are represented below in gross amounts.

<i>(In thousands of USD)</i>	Exposure as at 31 December 2024	Exposure as at 31 December 2023	External benchmarks used
			PD
Cash and cash equivalents	17 272	14 667	Standard & Poor's/Moody's/Expert RA
Investment securities measured at amortised cost	-	10 945	Standard & Poor's
Prepayment and other assets	151 497	234 599	Expert RA

As at 31 December 2024 and 31 December 2023 the Company assessed credit risk of the parent company and its subsidiaries based on internal model that considers various quantitative and qualitative factors or basing on ratings from rating agencies. The internal rating scale is mapped to external credit ratings, so the internal rating categories match with ratings of S&P.

Loss allowance

During the year, the following gains/(losses) were recognised in profit or loss in relation to financial assets and contract assets:

<i>(In thousands of USD)</i>	Note	For the year ended 31 December 2024	For the year ended 31 December 2023
Cash and cash equivalents	12	47	54
Receivables under resale agreements		-	5
Investment securities measured at amortised cost		31	11 595
Prepayments and other assets	16	(27 998)	(41 004)
Total impairment of debt financial assets		(27 920)	(29 350)

Reconciliation of the loss allowance from the opening to the closing balances by class of financial instruments are presented in Notes 12, 16.

Liquidity

Liquidity risk is the risk that an entity will encounter difficulties with raising money in meeting obligations associated with financial liabilities. The most popular products of the Company are yield-enhancement products such as barrier reverse convertibles and autocallables. The Company has an exposure to the risk of early termination of such products in case of autocall event that could affect its available cash resources. The Company does not maintain cash resources to meet all possible obligations as experience shows that a maximum level of termination of forward contracts/notes can be predicted with a high level of certainty based on experience. The Company holds a trading security portfolio for the hedging purposes of issued notes and forward contracts. Emerging liquidity gaps as a result of early termination of forward contracts can be mitigated by selling of securities from a trading portfolio.

Liquidity risk is managed by the trading desk by means of monitoring liquidity positions on a daily basis. The trading desk analyses the liquidity profile of the financial assets and liabilities to ensure that sufficient liquidity is maintained within the Company as a whole. The daily liquidity position is monitored and regular liquidity stress testing under a variety of scenarios covering both normal and more severe market conditions is performed by the risk management of the Company.

The following table shows the liquidity analysis of financial liabilities at 31 December 2024 and 31 December 2023. For non-derivative financial liabilities, the cash flows represent undiscounted cash flows on the basis of their earliest possible contractual maturity. The cash flows for notes issued are represented based on undiscounted cash flows excluding expected cash flows from embedded derivatives.

	31 December 2024						
<i>(In thousands of USD)</i>	Carrying amount	Contractual cash flows	Demand and less than 1 month	From 1 to 3 months	From 3 to 6 months	From 6 to 12 months	More than 1 year
Non-derivative financial liabilities

The tables below show the expected maturity analysis of financial assets and liabilities at their carrying amounts and based on their contractual maturities. Trading assets are presented as on demand because management believes they are highly liquid and can be sold on demand to meet cash outflows on financial liabilities. Impaired assets are included at their carrying amounts net of allowance for impairment and based on the expected timing of cash inflows.

Capital risk

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or raise debt. The allocation of capital between specific operations and activities is, to a large extent, driven by optimization of the return achieved on the capital allocated. The process of allocating capital to specific operations and activities is undertaken by senior management.

The Company's overall strategy remains unchanged from last year.

Other risks

The Company is also exposed to a number of other risks, including:

- Borrowings and lending are denominated in currencies that match the cash flows generated by the underlying operations of the Company. This provides an economic hedge without derivatives being entered into and therefore hedge accounting is not applied in these circumstances. In respect of monetary assets and liabilities denominated in foreign currencies, the Company's policy is to ensure that its net exposure is kept to an acceptable level by buying and selling foreign currencies at spot rates when necessary to address short-term imbalances.
- Operational Risk is the risk of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from external events. Losses can take the form of direct financial losses, regulatory sanctions or lost revenues, e.g. due to the failure of a system. Such events may also lead to reputational damage that could have longer-term financial consequences. Operational risk is limited by means of organizational measures, automation, internal control and security systems, written procedures, legal documentation, loss mitigation techniques and business continuity plan overseen by management, among other measures.
- Legal risk is the risk that agreements and contracts are ineffective in protecting the Company from claims against it by third parties.
- Regulatory Compliance Risk - the risk that the Company suffers financial, reputational or litigation damage through failure to adhere to, monitor, control update and eliminate or substantially reduce regulatory compliance risk.
- IT Risk (including Cyber risks) is the risk that IT systems fail to support the Company's business operations and/or to provide reliable management information on a timely basis.
- Reputational risk is the current or prospective risk to earnings and capital arising from an adverse perception of the image of the Company on the part of counterparties, shareholders, investors or regulators. Reputational risk could be triggered by poor performance, fraud, theft, legal action or regulatory fines.
- Political risk is the risk that the Group's investment's returns or operations could suffer as a result of political changes in the country or globally.
- Model risk is the risk of financial loss due to inappropriate model assumptions or inadequate model usage. The consequence of an inadequate model could be an incorrect valuation, leading to incorrect risk measurement and incorrect hedging positions, both of which could result in a financial loss.
- Tax risk is the risk of losses arising from changes in taxation (derived from tax legislation and decisions by the courts), including the misinterpretation of tax regimes as well as the manner in which they may be applied and enforced.

11 Income taxes

<i>(In thousands of USD)</i>	For the year ended 31 December 2024	For the year ended 31 December 2023
Current tax	(1 025)	(1 222)
Income tax expense for the year	(1 025)	(1 222)

The reconciliation of effective tax rate is based on the applicable tax rate in Cyprus. In 2024 and 2023 the applicable tax rate is 12,5%.

<i>(In thousands of USD)</i>	For the year ended 31 December 2024	For the year ended 31 December 2023
(Loss) profit before tax	(1 670)	14 835
Theoretical tax at statutory rate of 12,5%	209	(1 854)
Tax effect of items which are not deductible or assessable for taxation purposes:		
- tax exempt income	10 528	26 655
- non-deductible expenses	(12 948)	(25 876)
Deferred tax assets for the period unrecognized	1 262	(118)
Tax withheld	(76)	(29)
Income tax expense for the year	(1 025)	(1 222)

Under certain conditions interest income may be subject to defence contribution at the rate of 30%. In such cases this interest will be exempt from corporation tax. In certain cases, dividends received from abroad may be subject to defence contribution at the rate of 17%. The Company has taxable losses in the amount of EUR 11 903 thousand (USD 12 400 thousand) in 2024 (2023: EUR 18 751 thousand/USD 20 697 thousand) that are available for offsetting against future taxable profits of the companies in which the losses arose. The tax loss can only be utilised during the years 2024 – 2027. Deferred tax assets have not been recognised in respect of these loss as it may not be used to offset taxable profits, the Company has no tax planning opportunities or other evidence of recoverability in the near future. If the Company was able to recognise all unrecognized deferred tax assets, the profit would increase by USD 1 550 thousand (2023: USD 2 587 thousand).

12 Cash and cash equivalents

The external credit rating of the parent company and its subsidiaries was withdrawn in April 2022. Therefore, as at 31 December 2024 the Company assessed credit risk of the parent company and its subsidiaries based on internal model that considers various quantitative and qualitative factors or basing on ratings from rating agencies. The internal rating scale is mapped to external credit ratings, so the internal rating categories match with ratings of S&P.

As at 31 December 2024 and 31 December 2023, where applicable the Company used ratings of S&P, Moody's, Fitch and RAEX.

The credit quality analysis presented in the tables above is based on rating categories matched to ratings of S&P.

Movement in the loss allowance during the year ended 31 December 2024 and 31 December 2023 were as follows:

<i>(In thousands of USD)</i>	
Loss allowance at 1 January 2024	(64)
Reversal of loss allowance	47
Loss allowance at 31 December 2024	(17)

<i>(In thousands of USD)</i>	
Loss allowance at 1 January 2023	(117)
Foreign exchange difference	(1)
Reversal of loss allowance	54
Loss allowance at 31 December 2023	(64)

At 31 December 2024 and 31 December 2023, the Company measures loss allowances as 12-month ECL as far as credit risk on cash and cash equivalent has not increased significantly since their initial recognition.

As at 31 December 2024 the Company has one counterparty (2023: one) whose balance exceed 10% of equity. The gross value of this balance as at 31 December 2024 was USD 15 450 thousand (2023: USD 104 840 thousand).

Loss allowance	(135 645)	(108 531)
Total net amount	14 398	126 068

The external credit rating of the parent company and its subsidiaries was withdrawn in April 2022. Therefore, as at 31 December 2024 the Company assessed credit risk of the parent company and its subsidiaries based on internal model that considers various quantitative and qualitative factors or basing on ratings from Russian national rating agencies (if available). The internal rating scale is mapped to external credit ratings, so the internal rating categories match with ratings of S&P.

As at 31 December 2024 and 31 December 2023, where applicable the Company used ratings of S&P, Moody's, Fitch. For all other counterparties the credit rating was assessed basing on ratings from Russian national rating agencies. Receivables from brokers and counterparties was categorised as Lifetime ECL credit impaired due to sanction legislation restrictions, and not caused by the creditworthiness of the counterparties.

The credit quality analysis presented in the tables above is based on rating categories matched to ratings of S&P.

Significant changes in the gross carrying amount of prepayments and other assets that contributed to changes in loss allowance were as follows:

<i>(In thousands of USD)</i>	Loss allowance			Gross book value

31 December 2023	(2 000)	(106 531)	(108 531)	87 457	147 142	234 599

As a result of the sanctions imposed by the United States of America and the European Union on the Russian government, as well as major financial institutions and certain other entities and individuals in Russia, receivables of USD 145 139 thousand were restricted over trading and movement in depositories (31 December 2023: USD 147 142 thousand). The Company created the provision of USD 134 372 thousand (31 December 2023: USD 106 531 thousand) based on the management estimation of recoverability.

As at 31 December 2024 the Company has two counterparties (2023: three) whose balance exceed 10% of equity. The gross value of this balance as at 31 December 2024 was USD 141 584 thousand (2023: USD 224 795 thousand).

17 Notes issued

<i>(In thousands of USD)</i>	31 December 2024	31 December 2023
<i>Notes issued, carried at fair value</i>		
Credit Linked Notes	11 202	40 139
Share Linked Notes	65 750	94 251
Hybrid Notes	2 284	12 990
Total	79 236	147 380

Credit Linked Notes have maturity in 2025-2026 (31 December 2023: 2024-2026), Share Linked Notes have maturity in 2025-2027 (31 December 2023: 2024-2027), Hybrid Notes have maturity in 2025-2027 (31 December 2023: 2024-2027). Actual coupon amount per notes carried at fair value depends on the performance of underlying assets.

18 Loans payable

Loans payable comprises a marginal loan from the related party that is collateralised by trading assets except derivatives, notes issued and by financial collateral provided by other related parties under common control of the ultimate shareholder. The loans are payable on demand and secured by debt and equity securities held on the margin brokerage account.

The following table provides information on carrying value of securities held on margin brokerage account that represent a collateral:

<i>(In thousands of USD)</i>	31 December 2024	31 December 2023
Trading assets except derivatives	2 369	342 690
Notes issued	11 637	21 822
Total collateral	14 006	364 512
Total loans payable	88 074	425 834

19 Share capital

The Company's authorised and issued capital consists of 15 000 ordinary shares with a nominal value of 1,71 EUR each, issued at par.

During the year ended 31 December 2024 the Company did not pay dividends (2023: USD 0 thousand).

20 Financial assets and liabilities: fair values and accounting classifications

The estimates of fair value are intended to approximate the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, given the uncertainties and the use of subjective judgement, the fair value should not be interpreted as being realisable in an immediate sale of the assets or settlement of liabilities.

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments the Company determines fair values using other valuation techniques.

The objective of valuation techniques is to arrive at a fair value determination that reflects the price that would be received to sell the asset, or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

Valuation techniques include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist, Black-Scholes option pricing model and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.

The Company uses widely recognised valuation models for determining the fair value of common and more simple financial instruments, like interest rate and currency swaps that use only observable market data and require little management judgment and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities, exchange traded derivatives and simple over the counter derivatives like interest rate swaps.

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values are determined for measurement and for disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

Notes issued and forward contracts

Notes issued and forward contracts are complex structured instruments that include embedded derivatives. The Company has a large structured products portfolio with various payoff types. Majority of the portfolio are equity underlying instruments (US equities, Russian ADR/GDR, European equities, Chinese equities, some Russian local stocks etc.) Additionally, First to Default credit derivatives with baskets composed to Russian and International Eurobonds as underlying assets. Most underlyings are liquid. Local volatility model is used for the valuation of all equity linked products and a Gaussian Copula model for credit products. Valuations are performed using observable market data from Bloomberg and derived data (e.g. correlations and volatilities) calculated by Risk department.

Equity and debt securities

The fair value of equity and debt securities is determined by reference to their quoted closing last price at the reporting date, or if unquoted, determined using a valuation technique. Valuation techniques include market multiples and discounted cash flow analysis using expected future cash flows and a market related discount rate. The fair value of investments measured at amortised cost is determined for disclosure purposes only. In the event of a significant decrease in market activity for a security or if a quoted price is associated with transactions that are not orderly, the Company carries out an additional analysis of transactions and quoted prices with respect to the fair value relevance. Based on the analysis, the Company makes a decision on the need to adjust the fair value determined by market quotes or to apply the other valuation techniques for measuring the fair value.

In 2022, some of financial instruments of Russian issuers were blocked in European depositaries, which resulted in decrease of market activity of such instruments. In March 2022, market for such instruments divided into two perimeters – external and internal. In 2022 quotes for most of Russian Eurobonds for external perimeter became observable. For Russian local stocks situation is the most problematic with regard to fair value identification as no deals are allowed by European depositaries within their environments. Generally, the process of re-domiciliation is extremely unclear with a

high number of risks in each node of chain.

Listed Russian equity securities in Russian depositaries and listed non-Russian equity securities in non-Russian depositaries are valued at fair value by reference to their quoted prices (Level 1 fair value hierarchy).

Non-Russian listed equity securities in Russian depositaries are restricted over trading and movement with inability to be sold, receive dividends, or move them to another depositary. The Company calculated their fair value as an approximation of their quoted/listed prices (i.e. by applying a marketability discount to arrive at a price that it believes reflect the fair value (Level 3 fair value hierarchy). The marketability discount for non-Russian listed equity securities in Russian depositaries is set at 100% (31 December 2023: 100%).

Derivatives

The fair value of forward exchange contracts is based on their quoted market price, if available. If a quoted market price is not available, then fair value is estimated by discounting the difference between the contractual forward price and the current forward price for the residual maturity of the contract using a risk free interest rate (based on government bonds).

The fair value of options is based on broker quotes or is determined based on valuation techniques using observable inputs, either directly (i.e., as prices) or indirectly (i.e., derived from prices). Quotes are tested for reasonableness by discounting estimated future cash flows based on the terms and maturity of each contract and using market interest rates for a similar instrument at the measurement date. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk when appropriate.

Loans, trade and other receivables

The fair value of loans, trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date; fair values reflect the credit risk of the instruments.

Fair value hierarchy

The Company measures fair values for financial instruments recorded at fair value on the statement of financial position using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market price (unadjusted) in an active market for an identical instrument.
- Level 2: Valuation techniques based on observable inputs, either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

For assets and liabilities that are recognized in the financial statements at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company has a control framework with respect to the measurement of fair values. This framework includes a separate department, which is independent of front office management and reports to the Directors, and which has overall responsibility for verification of the results of trading and investment operations and all significant fair value measurements. Specific controls include:

- verification of observable pricing
- re-performance of model valuations
- a review and approval process for new models and changes to models
- quarterly calibration and back testing of models against observed market transactions.

Where third-party information, such as broker quotes or pricing services, are used to measure fair value, department assesses and documents the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS. This includes:

- verifying that the broker or pricing service is approved by the Company for use in pricing the relevant type of financial instrument
- understanding how the fair value has been arrived at the extent to which it represents actual market transactions
- when prices for similar instruments are used to measure fair value, how these prices have been adjusted to reflect the characteristics of the instrument subject to measurement
- where a number of quotes for the same financial instrument have been obtained, how fair value has been determined using those quotes.

The table below analyses financial instruments measured at fair value at 31 December 2024 and 31 December 2023, by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position:

<i>(In thousands of USD)</i>	31 December 2024				31 December 2023			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Financial assets								
Trading assets:								
- corporate bonds	13 030	-	-	13 030	16 418	7 033	-	23 451
- corporate shares	168 534	-	43 761	212 295	558 032	-	62 121	620 153
- exchange traded funds	-	-	-	-	970	-	-	970
- derivative assets	-	210 579	-	210 579	-	17 551	-	17 551
Investment securities measured at fair value through profit and loss	-	-	-	-	-	-	8 719	8 719
Total financial assets carried at fair value	181 564	210 579	43 761	435 904	575 420	24 584	70 840	670 844

Trading assets except derivatives

The following tables show a reconciliation for the years ended 31 December 2024 and 31 December 2023 for trading assets fair value measurements in Level 3 of the fair value hierarchy:

<i>(In thousands of USD)</i>	Corporate shares
Financial instruments at fair value at 1 January 2024	62 121
Additions	1 357
Disposal	(17 119)
Net loss recognised in profit or loss	(2 598)
Financial instruments at fair value at 31 December 2024	43 761

<i>(In thousands of USD)</i>	Corporate bonds	Corporate shares
Financial instruments at fair value at 1 January 2023	15 875	72 732
Additions	-	17 119
Redemption	(12 906)	-
Disposal	(1 926)	-
Foreign exchange difference	(17)	-
Net loss recognised in profit or loss	(1 026)	(27 730)
Financial instruments at fair value at 31 December 2023	-	62 121

The sensitivity of profit or loss to the changes of the fair value of corporate shares in the total amount of USD 38 051 thousand (31 December 2023: USD 50 894 thousand) categorized into Level 3 of the fair hierarchy to changes in the expected cash flows as of 31 December 2024 is not significant as the effect will be netted by changes of the fair valued of the notes issued with these shares as underlying assets.

In the event that underlying cash flows of the remaining corporate shares in the amount of USD 5 710 thousand (31 December 2023: USD 11 227 thousand) categorized into Level 3 of the fair hierarchy differ by plus/minus ten percent, its fair value as at 31 December 2024 would be USD 571 thousand higher/lower (31 December 2023: USD 1 123 thousand).

Investment securities measured at fair value through profit and loss

The following tables show a reconciliation for the years ended 31 December 2024 and 31 December 2023 for investment securities measured at fair value through profit and loss in Level 3 of the fair value hierarchy:

<i>(In thousands of USD)</i>	
Financial instruments at fair value at 1 January 2024	8 719
Disposal	(8 553)
Foreign exchange difference	(166)
Financial instruments at fair value at 31 December 2024	-

<i>(In thousands of USD)</i>	
Financial instruments at fair value at 1 January 2023	8 955
Net gain recognised in profit or loss	1 796
Foreign exchange difference	(2 032)
Financial instruments at fair value at 31 December 2023	8 719

In the event that the fair value of investment securities measured at fair value through profit and loss categorized into Level 3 of the fair hierarchy differ by plus/minus ten percent, its fair value as at 31 December 2023 would be USD 872 thousand higher/ lower.

Derivative liabilities

The following tables show a reconciliation for the years ended 31 December 2024 and 31 December 2023 for hybrid derivative liabilities in Level 3 of the fair value hierarchy:

<i>(In thousands of USD)</i>	
Financial instruments at fair value at 1 January 2024	11 407
New originated instruments	1 597
Disposal	(8 688)
Net loss recognised in profit or loss	(1 757)
Financial instruments at fair value at 31 December 2024	2 559

<i>(In thousands of USD)</i>	
Financial instruments at fair value at 1 January 2023	5 769
New originated instruments	6 163
Net gain recognised in profit or loss	(525)
Financial instruments at fair value at 31 December 2023	11 407

The sensitivity of profit or loss to the changes of the fair value of hybrid derivative liabilities in the total amount of USD 1 741 thousand (31 December 2023: USD 11 407 thousand) categorized into Level 3 of the fair hierarchy to changes in expected cash flows from underlying shares as at 31 December 2024 and 31 December 2023 is not significant. Fair value of hybrid derivative liabilities will be netted by changes of the fair value of underlying assets.

As at 31 December 2024 in the event that expected cash flows from underlying shares of remaining derivative liabilities in the total amount of USD 818 thousand categorized into Level 3 of the fair hierarchy differ by plus/minus ten percent, its fair value as at 31 December 2024 would be USD 82 thousand higher/ lower.

Notes issued

The following tables show a reconciliation for the years ended 31 December 2024 and 31 December 2023 for notes issued in Level 3 of the fair value hierarchy:

<i>(In thousands of USD)</i>	
Financial instruments at fair value at 1 January 2024	38 208
Net loss recognised in profit or loss	(1 953)
Financial instruments at fair value at 31 December 2024	36 255

<i>(In thousands of USD)</i>	
Financial instruments at fair value at 1 January 2023	94 562
Net loss recognised in profit or loss	(56 354)
Financial instruments at fair value at 31 December 2023	38 208

The sensitivity of profit or loss to the changes of the fair value of notes issued categorized into Level 3 of the fair hierarchy to changes in fair value of underlying shares as of 31 December 2024 and 31 December 2023 is not significant as the effect will be netted by changes of the fair value of the loans and shares with these notes as underlying assets.

The following table analyses the fair value of financial instruments not measured at fair value, by the level in the fair value hierarchy into which each fair value measurement is categorised as at 31 December 2023:

<i>(In thousands of USD)</i>	31 December 2023				
	Level 1	Level 2	Level 3	Total fair values	Total carrying amount
Assets					
Investment securities measured at amortized cost	7 772	-	-	7 772	10 914

Based on the analysis performed, management concluded that the fair value of all other financial assets and liabilities does not significantly differ from their carrying amount.

During the years ended 31 December 2024 and 31 December 2023 the Company disposed the whole portfolio of Investment securities measured at amortised cost as a part of the business restructuring process. The Company does not have any plans to purchase financial instruments measured at amortised cost.

21 Related party transactions

Control relationships

The Company's ultimate shareholder and controlling party is Mr. Oleg Mikhasenko.

Parties are generally considered to be related if the parties are under common control or one party has the ability to control the other party or can exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

At 31 December 2024 and 31 December 2023 the outstanding balances with the ultimate shareholder, parent company and related parties under control or significant influence of the ultimate shareholder are as follows:

Cash and cash equivalents, held on entities under control or significant influence of the ultimate shareholder

<i>(In thousands of USD)</i>	31 December 2024	31 December 2023
Cash balances on brokerage accounts	24 048	62 848
Deposits	-	45 166
Correspondent accounts and overnight placements with banks	-	3 543
Loss allowance	(16)	(63)
average rates	-	5,10%
Total	24 032	111 494

Derivative assets and liabilities with entities under control or significant influence of the ultimate shareholder

<i>(In thousands of USD)</i>	31 December 2024	31 December 2023
Hybrid derivatives	210 579	-
Credit default SWAPs	-	829
Total derivative assets	210 579	829
Derivative liabilities, including:		
Hybrid derivatives	(105 703)	(26 505)
Credit default SWAPs	-	(1 611)
Option	-	(238)
Total derivative liabilities	(105 703)	(28 354)

Prepayments and other assets from entities under control or significant influence of the ultimate shareholder

<i>(In thousands of USD)</i>	31 December 2024	31 December 2023
Receivables from brokers and counterparties, gross amount	107 363	147 937
Cash collateral on derivatives, gross amount	-	40 807
Loss allowance	(99 211)	(107 193)
Total	8 152	81 551

As at 31 December 2024 accounts receivable from brokers and counterparties mostly consist of cash payments per bonds and notes issued that have been frozen at the level of superior depositories.

As result of the sanctions imposed by the United States of America and the European Union on the Russian government, as well as major financial institutions and certain other entities and individuals in Russia, receivables of USD 107 354 thousand (31 December 2023: USD 147 406 thousand) were restricted over trading and movement in depositories. The Company created the provision of USD 99 211 thousand (31 December 2023: USD 106 725 thousand) based on the management estimation of recoverability.

Notes issued to entities under control or significant influence of the ultimate shareholder

<i>(In thousands of USD)</i>	31 December 2024	31 December 2023
Notes issued, carried at fair value		
Share Linked Notes	608	547
Total notes issued	608	547

Notes issued carried at fair value are held by the entities under control or significant influence of the ultimate shareholder for distribution to third parties.

Loans payable to entities under control or significant influence of the ultimate shareholder

<i>(In thousands of USD)</i>	31 December 2024	31 December 2023
Margin loan from the companies under common control	88 074	425 834
rate USD	5,31%	5,83%
rate EUR	4,41%	2,25%
rate RUR	20,47%	15,25%
rate CNY	1,71%	2,04%
Notes issued	11 637	21 822
Trading assets except derivatives held on margin account	35 783	342 690
Total assets held on margin account	47 420	364 512

According to the terms for the margin account the broker provides intraday credit facility that allow to the Company to borrow cash or other assets to buy financial instruments. Credit facility can be provided for transactions with eligible instruments only. The lender is allowed to sell instruments to settle loan in case of default of a borrower.

During the year ended 31 December 2024 the Company recognised fair value adjustments in the amount of USD 264 thousand (31 December 2023: USD 585 thousand) due to non-market rates on positive balances on margin account as capital contribution (2023: capital distribution) from shareholders.

Payables and other liabilities

<i>(In thousands of USD)</i>	31 December 2024	31 December 2023
<i>entities under control or significant influence of the ultimate shareholder</i>		
Payable for brokerage commission	36	795

	(107 084)	(42)	-	(107 126)

22 Segmental analysis

For management purposes, the Company is organised into two operating segments based on types of services provided as follows:

- Corporate business. The core activity of this segment is to enter into financial markets transactions with counterparties (corporates, financial institutions).
- Retail business. The core activity of this segment is providing of standardised structured products, including structured notes and forward contract to retail customers.

The Company's segments are strategic business units that focus on different customers and provide different types of financial products. The operating results of each segment are reported in a manner consistent with the internal reporting used by the Management. The Management receives information about the segments' revenue and assets on a monthly basis. During the year ended 31 December 2024, the Management has changed the approach to segmentation and allocated all debt financial assets and impairment of debt financial assets to corporate business segment.

The Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profits or losses and is measured consistently with operating profits or losses in the financial statements. However, income taxes are managed on a group basis and are not allocated to operating segments.

During the year, there were no revenues from transactions with other operating segments. The Company's total assets and liabilities are as follows:

<i>(In thousands of USD)</i>	Corporate Business	Retail Business	Total 31 December 2024
Assets as at the end of the year	64 249	452 860	517 109
